What we do in-house

- **Blades & heat treatment** — blanking, 2 annealing and 2 tempering furnaces, hardness verified on our Rockwell tester
 - **Grinding** — 5 vertical grinders and 10 water grinders for bevels, edges and mirror polishing
 - **Machining** — 20 CNC machining centres, drilling, pivot and spring-pin work
- **Finishes** — stonewash, sandblast, titanium coating, etching, anodising, laser logo
 - **Handles** — wood, G10/FRN, die-cast and injection-moulded, assembled in-house
 - **Private label** — your steel, your handle, your packaging, your branding

Every lot follows a documented 43-step routing with in-process QC and a per-batch hardness record. Blades are blanked, heat treated, ground, machined and assembled on the same site — nothing is subcontracted.

Lead models — full specification

SKU	MODEL	BLADE / OAL	STEEL	HRC	NET WT	PACKING	MOQ
